Education

Northeastern University *Boston, MA*

Master of Science in Information Systems *Expected May 2024*

Coursework: Program Structures & Algorithms, Application Engineering & Development, Web Design & User Experience, Data Management & Database Design

Madhav Institute of Technology and Science *Gwalior, India*

Bachelor of Engineering in Computer Science Engineering *May 2017*

Technical Skills

Programming	Python, Java, Groovy, Shell, JavaScript
Technologies	NodeJS, Express, React, HTML5, CSS3, Rest APIs
Softwares/Tools	Jenkins, Docker, Kubernetes, OpenShift, Git, Bitbucket, Maven, Nexus, Helm, PostgreSQL, VMware vCloud, Linux, Ansible, VS Code, Postman, Eclipse, NetBeans, Jira
Databases	MongoDB, Microsoft SQL Server, MySQL, PostgreSQL
Cloud	EC2, IAM, CodePipeline, Elastic Kubernetes Service, Lambda, S3, MSK, RDS, CloudWatch, VPC, CloudFormation

Work Experience

Amdocs Development Centre India *Pune, India*

DevOps Cloud Engineer *Nov 2019 – Aug 2022*

- Developed and integrated organization wide Microservice CI/CD and Release Process on AWS working closely with EKS, Helm deployments, Jenkins, Nexus, and Shared Groovy Libraries.
- Designed and executed a solution for cryptographic signing of container images using Python, Docker, Notary, and Open Policy Agent to maintain integrity of images while deploying on customer's EKS thus improving process by 80%.
- Built a Java application to store record of Linux servers and assimilated it with Grafana dashboard to monitor health of servers and utilized MySQL database to store state of servers.
- Automated company's FOSS scanning process and identification of security vulnerabilities as part of the CI pipeline utilizing Python, Groovy, Jenkins, OpenShift, Postgres, and Black Duck to enhance performance in production up to 50%.

Accenture Solutions Pvt. Ltd. *Mumbai, India*

Software Engineer *Jun 2017 - Oct 2019*

- Developed Groovy shared libraries to render Grafana Dashboard for checking resource utilization of Linux Machines which was able to improve performance of application by 40%.
- Incorporated Amazon S3 to host static websites on AWS and integrated it with AWS CloudWatch metrics for monitoring therefore storage cost was minimized by 30%.
- Created and enhanced Linux shell scripts to run CI/CD pipelines, cron jobs and decreased manual tasks by 40%.

Projects

Food Inventory Management System *Boston, MA*

Northeastern University *Dec 2022*

- Developed an application using Java, swing, and object-oriented programming for food inventory management which donors, organizations, and enterprises may use across various networks to effectively handle data.
- Utilized a database to maintain all the information from donors, organizations, and businesses that can be retrieved by appropriate admin logins.
- Implemented Email functionality in application to notify users on account creation and provide other updates.

eLearning Application *Boston, MA*

Northeastern University *Dec 2022*

- Built an eLearning Application using React, MongoDB, Express and Nodejs having components such as User login/register, save Lecture Notes, Course Catalog, Videos, Assessments, Blogs.
- Used JSON Web Tokens for user authentication and SCSS, material UI for styles.

Blue Green Deployment on AWS *Pune, India*

Capstone Project *Dec 2020*

- Strategized the Blue-Green deployment on AWS and Azure which helped in running old and new versions of microservices in parallel, thereby new versions were deployed with zero downtime in production.
- Created microservices and AWS Elastic Kubernetes service clusters from scratch and managed deployment incorporating various DevOps tools.

Certifications

- AWS Sysops Administrator Associate
- Microsoft Certified Azure Fundamentals - AZ900
